

**ENVIRONMENTAL POLICY**  
**Procedure: RB/ Environment/001**

Issue: 1

review due 01/01/14

---

As a matter of company policy Rose Builders & Contractors are committed to maintaining high environmental standards throughout its operations, minimising its impact on the environment and continually improve its environmental performance and standards.

All site operations are to be risk assessed regularly and all employees educated in the affect of their actions on the environment to ensure a united commitment to continuous improvement. All reasonable steps will be used to reduce any impact on the environment of works undertaken.

Our business operations will be managed and site works will be planned to mitigate the environmental impact of such operations, with particular reference to issues such as:-

- Compliance with Environmental Legislation and Approved Codes of Practice as a minimum level for performance
- Minimise waste of all resources making responsible use of energy, water and natural materials
- Use of appropriate recycled products or materials from renewable resources where available
- Damage and nuisance reduction through minimisation of waste and pollution (eg. Noise, dust, etc)
- Management of waste through use of 'Site waste Management Plans' to reduce, reuse and recycle resources
- Encouragement and education in environmental awareness for both employees and sub-contractors through toolbox talks and handouts / updates
- Plan operations to minimise disturbance to the local community and keep them informed of any unavoidable disturbances
- Monitor performance and review on an annual basis
